

Dear Chairman Martin, Commissioners Adelstein, Copps, McDowell, and Tate:

I am a deaf person and I use Video Relay Service (VRS) to communicate. I was appalled to learn that the FCC staff is intent on drastically cutting the VRS rate, and effectively cutting VRS availability for the deaf. Instead of seeking to limit the number of deaf people with VRS access, the FCC should do everything in its power to make VRS available to more deaf people.

I, along with other Deaf individuals, use these services in both my work and personal life. It is an important way in which I/we communicate with both hearing and deaf individuals. I urge you to do everything you can to make VRS service available to the many deaf people who currently do not have access to this vital, life-changing service.

The VRS rate should encourage the VRS providers to:

- Serve more deaf people, not discourage them from reaching out to more deaf people
- Provide interpreter training programs so that there will be an adequate number of qualified interpreters for VRS and the local Deaf communities
- Provide service and technology improvements, such as the development of new videophone equipment, fulfilling the Americans with Disabilities Act (ADA) mandate of functionally equivalent telecommunications services

I, along with other deaf individuals, their families and coworkers, depend on VRS and other relay services.

Please stop any VRS program cuts and fulfill the mandate of the Americans with Disabilities Act (ADA) to provide deaf people with functionally equivalent telecommunications services.

Sincere

Dear Chairman Martin, Commissioners Adelstein, Copps, McDowell, and Tate:

I am a deaf person and I use Video Relay Service (VRS) to communicate. I was appalled to learn that the FCC staff is intent on drastically cutting the VRS rate, and effectively cutting VRS availability for the deaf. Re: CG Docket No. 03-123

30M 1 1 2007

Dear Chairman Martin, Commissioners' Adelstein, Copps, McDowell & Tate,

I am the mother of a deaf daughter who for the first time in her life, has been able to communicate in a much more efficient manner than ever before. This is because of the VRS System that she has been using for the past year and a half. My daughter is now able to make her own doctor's appointments, talk with our hearing relatives and has been able to carry on quality conversations with her hearing friends as well as communicate freely with her deaf friends.

In the past, when she did have use of the TTY, she would still ask me to make appointments, call her friends, etc. and this was mainly because although she is of normal intelligence, she found it very difficult to correctly spell or put into understood grammar, the things that were very important for her to get across via TTY.

Another thought that my daughter has, is that when deaf people go to hospitals for emergency treatments, it is very hard to get an interpreter on the spot when needed. If all hospitals were equipped with VRS, the deaf could more efficiently communicate their problems to the doctors', nurses and staff through this service. Also, it would increase the confidentiality of these visits as most of the interpreters would not be from the clients' hometowns. VRS could also be used in Federal Offices such as the Social Security Administration, License Bureau's, etc. These units could be set up on a rolling stand and if a deaf person came in for an interview, the interviewer could relate their questions with much less time and trouble as conversation is almost instant.

These are just a few of the ways VRS could help both deaf and hearing individuals and I am pleading with you to not only keep the existing services, but to consider increasing them, because in the long run, it

would be more cost efficient for businesses, schools, hospitals, etc, to tap into using Video Relay Service, rather than having to use very highly paid Sign Language Interpreters, who might not be available when needed.

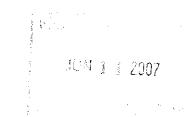

Very truly yours,

Cecelia Collegon

Instead of seeking to limit the number of deaf people with VRS access, the FCC should do everything in its power to make VRS available to more deaf people.

I, along with other Deaf individuals, use these services in both my work and personal life. It is an important way in which I/we communicate with both hearing and deaf individuals. I urge you to do everything you can to make VRS service available to the many deaf people who currently do not have access to this vital, life-changing service.

The VRS rate should encourage the VRS providers to:

- Serve more deaf people, not discourage them from reaching out to more deaf people
- Provide interpreter training programs so that there will be an adequate number of qualified interpreters for VRS and the local Deaf communities
- Provide service and technology improvements, such as the development of new videophone equipment, fulfilling the Americans with Disabilities Act (ADA) mandate of functionally equivalent telecommunications services

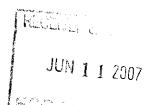

I, along with other deaf individuals, their families and coworkers, depend on VRS and other relay services.

Please stop any VRS program cuts and fulfill the mandate of the Americans with Disabilities Act (ADA) to provide deaf people with functionally equivalent telecommunications services.

Sincerely,

· Mickee Brichauau

Federal Communications Commission (FCC) 445 Twelfth Street SW Washington, DC 20554

CG Docket No. 03-123; TRS Fund-Drastic VRS Rate Cuts

- JUM 1 1 2007

Commissioners Adelstein, Copps, McDowell, and Tate:

I am a deaf person and I use Video Relay Service (VRS) to communicate. I was appalled to learn that the FCC staff is intent on grastically cutting the VRS rate, and effectively cutting VRS availability for the deaf, instead of seeking to limit the number of deaf people with VRS access, the FCC should do everything in its power to make VRS available to more deaf people.

I, along with other Deaf individuals, use these services in both my work and personal life. It is an important way in which I/we communicate with both hearing and deaf individuals. JUNA 1 1 2007

Dear Chairman Martin, Commissioners Adelstein, Copps, McDowell, and Tate:

I am a deaf person and I use Video Relay Service (VRS) to communicate. I was appalled to learn that the FCC staff is intent on drastically cutting the VRS rate, and effectively cutting VRS availability for the deaf. Instead of seeking to limit the number of deaf people with VRS access, the FCC should do everything in its power to make VRS available to more deaf people.

I, along with other Deaf individuals, use these services in both my work and personal life. It is an important way in which I/we communicate with both hearing and deaf individuals. I urge you to do everything you can to make VRS service available to the many deaf people who currently do not have access to this vital, life-changing service.

The VRS rate should encourage the VRS providers to:

- Serve more deaf people, not discourage them from reaching out to more deaf people
- Provide interpreter training programs so that there will be an adequate number of qualified interpreters for VRS and the local Deaf communities
- Provide service and technology improvements, such as the development of new videophone equipment, fulfilling the Americans with Disabilities Act (ADA) mandate of functionally equivalent telecommunications services

I, along with other deaf individuals, their families and coworkers, depend on VRS and other relay services.

Please stop any VRS program cuts and fulfill the mandate of the Americans with Disabilities Act (ADA) to provide deaf people with functionally equivalent telecommunications services.
